DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities: the priority data should be updated to indicate that U.S. Serial No. 09/638,166 is now U.S. Pat. No. 6,735,617.

Appropriate correction is required.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 16 – 26 and 43 – 53 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Independent claim 16 is directed to a method that can be interpreted as a program.

Independent claim 43 is directed to a system that can be interpreted as a program.

Data structures not claimed as embodied in computer-readable media are descriptive material *per se* and are not statutory because they are not capable of causing functional change in the computer. See, e.g., *Warmerdam*, 33 F.3d at 1361, 31 USPQ2d at 1760 (claim to a data structure *per se* held nonstatutory). Such claimed data structures do not define any structural and functional interrelationships between the data structure

Art Unit: 2141

and other claimed aspects of the invention which permit the data structure's functionality to be realized. In contrast, a claimed computer-readable medium encoded with a data structure defines structural and functional interrelationships between the data structure and the computer software and hardware components which permit the data structure's functionality to be realized, and is thus statutory.

Hardware can be added to these independent claims (method implemented in hardware; system implemented in hardware) in order to overcome the 35 USC 101 rejection.
